

# Four Phases of Ongoing Innovation

## ***Sustaining:***

Creating sustainability so that the next generation of leaders owns the vision as much as the Task Force does at the end of The RE-IMAGINE Project, keeps funding innovations and innovating through a cycle of experimentation, evaluation, learning and action

## ***Innovating:***

Innovating again, launching another alternative model, moving ever closer to that vision and;

## ***Aligning:***

Building beyond first bold steps to reach an alternative model, including defining learner outcomes, aligning the different parts of the system to the new vision, evaluating process and learner outcomes with feedback into the system;

## ***Launching:***

Congregations write a vision, define an alternative model, and launch first bold step in the direction of that model
